Changes

Users Table of Database

The Users Table is splitted in two tables: the first with the user's informations, like name, surname and ClasseViva ID; and the second with the user's credential.
The second table are used only if the user is a local one. The password saved in this table are encrypted with the *hash512 algorithm* and at the password precede 25 character of *pepper* and follow 25 character of *salt*.
